REPORT OF WORLD NATURE CONSERVATION DAY 2026

As part of World Nature Conservation Day, the NSS Unit and Nature Club of KMCT National College of Pharmacy organized a visit to the residence of Environment Man Gopal, a well-known nature conservationist, under the programme "**Living with Nature – An Inspiring Journey.**"

The participants visited Mr. Gopal's unique eco-friendly house, which was built above a pond in perfect harmony with nature. The surroundings of his house were filled with a wide variety of trees, medicinal plants, and other native species, creating a rich and peaceful natural environment.

During the visit, he guided the participants through a forest that he had personally developed over the years. He shared his inspiring journey of environmental conservation and explained how he has been planting native tree saplings in different parts of Kozhikode to restore green cover and protect biodiversity.

Mr. Gopal also introduced several medicinal plants and explained their traditional medicinal uses and importance in daily life. His practical knowledge, dedication, and commitment to conserving nature deeply inspired the students and faculty members.

The programme created awareness about the importance of protecting the environment, conserving biodiversity, and adopting sustainable lifestyles. The visit motivated the participants to become responsible citizens and actively contribute to nature conservation initiatives in their communities.
